Our Mission

Chatham Steel has over 95 years of successful history behind it. For an equally successful future, we must continually rededicate ourselves and the company to continue achieving its corporate mission which is:

- ◆ Being the size to operate as a significant force in the metals distribution business
 - ◆ Recognizing and respecting the interests of all our stakeholders
 - ◆ Making money by delivering value to our customers
 - ◆ Providing an environment where all people are fulfilled
 - ◆ Sharing our success
-

Our Commitment

Delivering 100% customer satisfaction takes commitment: To in-depth knowledge of the market. To the stongest inventory available. To advanced processing capabilities. To the fastest turn around. To the vision and leadership that keep our customers not at pace with the industry—but ahead of it for the future. That's the commitment we've made at Chatham Steel. And the kind of service you can expect, every time you call.

Chatham Steel Corporation

A history of great strength.

From its beginning as a scrap iron and metal business in Savannah, Ga., the company Samuel Tenenbaum founded in 1915 has grown to become a major steel service leader for more than 2,500 active clients. Chatham Steel Corporation, still headquartered in Savannah, now has branches in Columbia, S. C.; Orlando, Fla.; Birmingham, Ala.; Durham, N. C.; and Ironton, O. H. A family business for more than 80 years, Chatham became part of the Reliance Steel & Aluminum family in 1998, further enhancing our ability to meet and even anticipate our customers' needs.

Chatham's management continues to create a culture with the flexibility to respond to the changing needs of customers in today's environment. A component of this change began in the early '90s, with additional emphasis being placed on teamwork and continuous process improvement.

Chatham's primary product lines include carbon steel wide flange and I-beams, tubing, pipe, plate, sheet, angles and bars, as well as stainless steel plate, sheet, angles and bars. Chatham also carries a comprehensive inventory of high strength and alloy steel, aluminum and galvanized

materials. In addition to traditional wholesale product distribution, Chatham has advanced in-house processing capabilities that include plasma and flame shape burning, shearing, sawing, forming, drilling, punching and machining so that we can work closely with customers to meet their unique needs. And through the use of our advanced logistical system, Chatham offers superior reliable delivery service.

In 2008, our management team committed the resources to enhance our quality program to serve the nuclear industry. Chatham now supplies dedicated products that meet the stringent requirements of ASME NQA-1 standards. Our capabilities in serving the nuclear industry will be expanding throughout the coming years.

Chatham continues to invest in new facilities, products, state-of-the-art metal processing equipment and information systems that improve our ability to respond quickly and accurately to our customers' requirements.

A Complete Carbon and Stainless Steel Service Center

Product

STRUCTURAL AND BAR SHAPES

PLATES - Carbon, Alloy, Stainless, Aluminum

BARS - Hot Rolled, Cold Finished, Stainless, Aluminum

SHEETS - Black, Galvanized, Stainless, Aluminum

PIPE AND TUBING - Carbon, Alloy, Stainless, Aluminum

EXPANDED METAL AND BAR GRATING - Carbon and Stainless

FIBERGLASS GRATING

Processing

SAWING - Square & Mitre

SHEARING - Braking, Forming

CUTTING - Flame, Plasma, Laser

PUNCHING, DRILLING & MACHINING

TEE SPLITTING & STRAIGHTENING
